

Package ‘Rhtslib’

April 12, 2022

Title HTSlib high-throughput sequencing library as an R package

Description This package provides version 1.7 of the 'HTSlib' C library for high-throughput sequence analysis. The package is primarily useful to developers of other R packages who wish to make use of HTSlib. Motivation and instructions for use of this package are in the vignette, `vignette(package = `Rhtslib`, `Rhtslib`)`.

Rhtslib-package	<i>An R packaged HTSlib 1.7</i>
-----------------	---------------------------------

Description

This package is interesting to package developers only, and provides a compiled HTSlib for developers to use in their own packages. See the vignette for instructions on use.

Details

Instructions for use are in the vignette, available with `browseVignettes(package="Rhtslib")`

Author(s)

Nathaniel Hayden nhayden@fredhutch.org

References

The HTSlib included in the package is based on release 1.7 of HTSlib found in the GitHub repository at <https://github.com/samtools/htslib>

Examples

```
packageDescription('Rhtslib')
Rhtslib:::htsVersion()
```

`pkgconfig`*Compiler configuration arguments for use of Rhtslib*

Description

This function returns values for `PKG_LIBS` and `PKG_CPPFLAGS` variables for use in Makevars files. See `vignette("Rhtslib")` for details. The environment variable `RHTSLIB_RPATH` can be used to over-ride the inferred location of the installed package.

Usage

```
pkgconfig(opt = c("PKG_LIBS", "PKG_CPPFLAGS"))
```

Arguments

`opt` A scalar character from the list of available options; default is `PKG_LIBS`.

Value

NULL; prints the corresponding value to stdout.

Author(s)

Nathaniel Hayden <mailto:nhayden@fredhutch.org>

Examples

```
pkgconfig("PKG_LIBS")  
pkgconfig("PKG_CPPFLAGS")
```
